Chromosome Mapping and Vision Statements

At the brink of the new century, just weeks before the start of the Church's Jubilee in honor of the second millennial anniversary of the birth of Christ, an international team of researchers announced it had decoded the genes that make up the DNA of chromosome 22.

The information is housed in the 33.5 million chemical components found and mapped on just one of the 23 human chromosome pairs. Scientific breakthroughs such as this one remind me of what a marvel God's creation truly is. These infinitesimal bits of information, housed deep within even a human zygote, determine much of what we will become.

What a wonder.

At Merrimack, we have a special kinship to genetic research. The father of genetics, Gregor Mendel, was an Augustinian scholar. Mendel, a monk and a high school science teacher, cross-pollinated plants by the thousands to prove his theory of inheritance.

The legacy we've inherited from Mendel reaches beyond even gene theory. He performed his work "for the fun of it," saying the scientific theories "forced themselves upon notice." When our work delights us, great things can come of it.

Genetics tells us who, at the most basic biochemical level, we are. Among the genes found on Chromosome 22 were those responsible for congenital heart disease, schizophrenia, mental retardation, birth defects, and several cancers, including leukemia. The insights gained could mean major advances in the diagnosis and treatment of disease.

Biochemically or spiritually, knowing who you are can ease your way through this world. Over the past several years, we've worked hard to determine what it means to be Merrimack College: in short, Merrimack is a pre-eminent Catholic college of the liberal arts and

the professions, founded in the Augustinian tradition. A strong identity, as articulated in our Vision Statement, is not unlike the DNA maps of chromosome 22. Knowing who we are helps us to successfully navigate the challenges and opportunities we face each day.

As a part of the greater community of Catholic colleges and universities in the United States, we have been presented with just such a challenge. In response to Pope John Paul II's 1990 decree, "Ex Corde Ecclesiae," American bishops have drafted new standards for Catholic higher education; their proposal has been delivered to the Pope for his approval.

While Ex Corde recognizes institutional autonomy and academic freedom, legitimate concerns over its implementation exist. I've been meeting with Cardinal Bernard Law and presidents of other Catholic colleges and universities for several years in anticipation of this doctrine, and am confident we can forge a way of working together for the ultimate goals of truth and common good.

Merrimack's identity as a Catholic institution is strong. Our longstanding commitment to service through Alternative Spring Break and Merrimaction, the newly created Center for Augustinian Studies, a vice-presidential position devoted exclusively to mission effectiveness, and the outstanding work of Campus Ministry are only the most outward and visible signs of a religiosity that permeates everything we do. Being Catholic has always been a dominant characteristic around here — it distinguishes us from the hundreds of

Richard J. Santagati

David Oxton photo

other small colleges we compete with. We go beyond complying with doctrine, we celebrate our Catholicism.

Our self knowledge helps us capitalize on opportunity, as well. As a pre-eminent college of the liberal arts and professions, Merrimack is proud to create The Francis Girard School of Business. Thanks to a very generous gift from Mr. Girard, a class of 1962 graduate, we've been able to elevate the business division to a full-fledged school, thereby raising the standard for excellence in teaching and learning for business professionals at Merrimack. Excellence in teaching and learning throughout our small college is our goal, and we will not accept any less.

In closing, I'll tell you a small secret: I am as delighted to work each day at Merrimack as Mendel was to putter in his 19th century pea garden in Austria. Our students possess the finest minds and hearts of any community of scholars, and will grow strong and tall in the proud tradition of Catholic and Augustinian scholars.

Biochemist Is a Warrior in the Battle Against Cancer

by David Rattigan

In her eighth-grade yearbook, Josephine Modica explained why she wanted to be a biochemist: She was going to cure cancer.

As an adult, she's working on it.

For more than 10 years, Dr. Josephine Modica-Napolitano has worked on a research project to determine the differences between mitochondria - the small energy-producing compartments inside human cells - in healthy cells and certain types of cancer cells.

"Cells need energy, and this is where the energy is produced," says Napolitano, an associate professor in the biology department. In studying the differences in the mitochondria, she hopes to develop a better understanding of the makeup of cancer cells, which could lead to a better treatment.

"If we find a fundamental difference between the mitochondria of normal cells and cancer cells, we can synthesize a drug specifically targeted for that molecule inside the cancer cell," says Napolitano, who draws on the war analogy of fighting disease, comparing the concept of drugs that can target the diseased cells without damaging those around it to a smart bomb that can hit a pinpoint target while doing minimal damage to the surrounding region.

That is not the case with traditional cancer treatments such as radiation therapy or chemotherapy.

"You end up not only killing the cancer cells but killing normal, healthy cells as well," she says. "That's why there are side effects that limit treatment. People end up getting sick because (the therapies) are also affecting healthy tissue."

In her research thus far, Napolitano has studied cells of common cancers

such as of the skin, lung, breast, colon, and prostate. She has found differences in the mitochondria of cancer cells compared to normal, healthy cells.

"We know the differences at the gross levels," she says. "What we're trying to do is refine it and pinpoint that molecular difference. Then (science) can create a therapy that will target that molecular difference."

Originally her doctoral thesis at Tufts, the project has been funded by the National Cancer Institute of the National Institutes of Health, which awarded it a three-year, \$75,000 grant in 1998, as part of a program that funds research

during the academic year, and can be much more productive because they already have the basics. All these students are applying either to graduate school or medical school. They need a competitive edge, and this research gives them that. The intent is that they'll come up with publishable data."

"It is a really, really good project," says Chilingh Nguyen, a senior biochemistry major who is one of the researchers. "My goal is to get into medical school, but if I don't, this is what I'll do, research in cancer."

A frustrating reality of science is that research can be an agonizingly slow

If we find a fundamental difference between the mitochondria of normal cells and cancer cells, we can synthesize a drug specifically targeted for that molecule inside the cancer cell.

projects at similarly sized colleges.

Last summer, five Merrimack students (one of whom was supported by a Presidential Scholarship) joined the project as paid researchers in a full-time, 10-week project. Some of their data will be used in publication of the work, and all five have continued the research as the foundation for their senior research thesis. In January, Napolitano presented work she developed with student Sue Ellen Touma at the Keystone Conference on Mitochondrial Dysfunction in Pathogens, held in Santa Fe, New Mexico.

"There's a real benefit for them," Napolitano says. "For 10 weeks, I'm with them one-on-one, and am able to teach them the techniques they need to learn to get started on their projects. Then they work under my supervision

process. Answers to some questions often lead to 10 more questions. Hopeful news about research breakthroughs are often followed by setbacks months or even years later. Nonetheless, Napolitano remains optimistic about science's quest for better medicine.

"Already, certain cancers such as childhood leukemias are very treatable, but for some others, like pancreatic cancer, hardly anything can help," she says. "In the next 50 years, I believe we'll find better ways of treating, inhibiting the growth, or preventing most forms of cancer."

David Rattigan photo

Dr. Josephine Modica-Napolitano, associate professor of biology, fights the war against cancer with a microscope.

Girard School Means Business

Big changes are in store for Merrimack's business division, thanks in large part to a \$2.5 million gift from an alumnus. Most noticeably, Merrimack's business programs will now have a school of their own: The Francis E. Girard School of Business and International Commerce.

More than just the name is changing. Ushering in the 21st century is a whole new way of teaching business at Merrimack College.

The Girard gift finances a number of projects aimed at enhancing college facilities and even its faculty: included in the package are the Francis E. Girard Endowed Chair in International Business; a business education resource center, including fellowships; a "Girard Auditorium," a larger version of Merrimack's smart classrooms; an endowment for the international business program; and the infrastructure for both internet and intranet.

The focus on international business is a happy convergence of both Girard's interest (over 70 percent of his business is overseas) and new business paradigms that require graduates to work in an international environment.

"Any business that has a web page is an international business," said Thomas Dukes, Dean of the Girard School.

Dukes is particularly enthused by the establishment of the endowed chair in international business.

He said the college will be looking for a teacher and a scholar who has developed or is developing international prominence, someone who will be able to mentor faculty as well as serve students.

"I want someone who's hungry," he said. "Someone who's ready to do great

stuff, who will do great stuff here at Merrimack. I don't know how you put that in an ad."

Dukes will also have the opportunity to fill another new chair, endowed by Robert J. Fabbriatore, chairman and chief executive officer of CTC Communications Group, Inc., in Waltham. The Fabbriatore chair is in the field of entrepreneurship. Along with the Ciejek Chair, endowed professorships in business now number three.

For the professors, perhaps the best result of the Girard gift is the increased number of smart classrooms. "It's changed the way I teach," said Patricia Sendall, associate professor of manage-

Gina Vega

ment. "We have so many tools at our fingertips now."

Describing herself as a "high-tech geek", Sendall said she's used the classrooms from the day they were installed. This semester, for example, Sendall teaches a course in database management systems. "It can be bor-

ing," she admits, "although I hope the way I teach it isn't boring."

The night before class, she'll work up a presentation at home on her laptop. Come class time, she'll plug in to the console, and pop seamlessly between her lecture notes and any number of websites. "I can show students websites that supplement their textbooks."

Also available for use in the smart classrooms are a document camera that will project any object, in three dimensions, on the classroom screen; DVD, CD-ROM, and VCR players; and a smart board, the digital version of the old-style black board which allows notes to be stored on disc before they're erased. Sendall points out that students are encouraged to use the equipment for their own presentations, preparing them for life in the high-tech world outside Merrimack.

"I don't know many small schools that have these things," she said. "It really gives us a competitive edge with students. And the students love the classrooms."

Taken together, the classroom enhancements, the increased support for quality teaching, and the refinements to the program undertaken by the faculty as part of its reach for AACSB accreditation are having a huge effect on both how business is taught and how the world looks at Merrimack's program.

"I'm so delighted," said Gina Vega, assistant professor of management. "It's making a tremendous psychological difference."

Vega said that, although the change from a business division to a business school is really only semantic, being part of the Girard School does give Merrimack a different status among its

Patricia Sendall at work in one of Merrimack's smart classrooms. At her fingertips is control of a wide array of media. Students, she says, love to learn in this environment.

Barry O'Hagan photo

Businessman Girard Gives Back — And Finds You Can Get Satisfaction

He never imagined how much satisfaction he'd find in giving Merrimack \$2.5 million dollars, says Francis E. Girard '62.

"It was time to give something back," he says. "I met Dick (President Santagati) over a year ago, and he told me all the great things that were happening at the college."

Girard agreed to join the President's Council. "The more I got involved with Merrimack, the more interested I became," he says. As he looked at the possibilities for making a large gift, endowing a faculty chair, funding a smart classroom, and so forth, he saw that a gift of \$2.5 million would give the college nearly everything the business division would need in its effort to win accreditation from the International Association for Management Education as one of the best small business schools in the nation.

"I shared the loyalty award at commencement, but felt I hadn't done much over the years. I was on a fast track, and there was no time to do it," he says. Girard is the CEO of Converse Network systems, a subsidiary of Converse Technology. The Standard and Poor's 500 company supplies the hardware and programs that run many of the nation's cellular and digital telephone networks.

Girard explains that at first, he was a bit uncomfortable with the publicity the gift, the largest alumni contribution to the college in its history, has generated.

One evening soon after he made the gift, however, he was on his way home, listening to the news on the radio. "And I heard them say, 'Brought to you by the Francis E. Girard School of Business and International Commerce at Merrimack College.' I nearly drove off the road!"

He hopes that others, seeing his example, will be inspired to increase their support of the college, as well.

"I'm honored to have the school named after me," he says quietly. "I really am."

Francis E. Girard '62

Thomas Dukes, dean of the Girard School

peers. Being called a school suggests a certain formality, structure, and commitment that being a division doesn't, she said.

Sendall echoed her sentiment, saying "When we go out there to conferences, the name gives us a certain status. The perception of us changes."

In many ways, the change to a business school is the culmination of the work that's been done over the past few years preparing for the accreditation.

"We've been doing self-studies, we're working on such interesting research, we've got the business advisory council, the executive lecture series; there is so much going on here," she said.

And, according to President Santagati, we haven't finished riding the wave yet. In the drive to position Merrimack College as the pre-eminent small Catholic college in the Northeast, the recent improvements at the Girard School are only the beginning.

McCloskey Appointed Academic V.P.

Rev. Gary N. McCloskey, O.S.A., has been appointed vice president of academic affairs. From 1990 to 1991,

Rev. Dr. Gary N. McCloskey, O.S.A.

McCloskey was the assistant to the president for urban affairs at Merrimack. Since that time, he has been at St. Thomas University in Miami, Fla., serving in a number of roles, including Vice President for Academic Affairs since 1994.

McCloskey brings a thorough knowledge of liberal arts education, proven skills in planning and curriculum development, a commitment to Catholic higher education, a solid understanding of the use of computer technology for educational enhancement, and talents not only as an academic leader but also as a teacher and a scholar.

McCloskey received a bachelor's degree from Villanova University, a master's in theology from Catholic University of America and another in computers in education from the Teachers College of Columbia University, and a doctorate in instructional leadership from the University of Miami in Florida.

Accept the Challenge Hosts Senator Kerry

Students from Accept the Challenge, the college's partnership with Lawrence High School, met with Senator John Kerry in the fall.

Since 1986, 36 Lawrence High School students have received full scholarships through Accept the Challenge. Each year, 35 to 40 academically promising, economically disadvantaged students are offered tutoring, mentoring, and other services aimed at preparing them for college.

The program helps students stay in school, go on to college, and become leaders.

Among the offerings this season at the Rogers Center for the Arts is the *Mystical Arts of Tibet*, a show endorsed by His Holiness the Dalai Lama as a means of promoting world peace and healing and also for raising international awareness of the endangered Tibetan civilization.

Rogers Center Inaugural Season Sparkles with Excitement

The long anticipated opening of the Rogers Center for the Arts met all expectations, and its first season of world-class entertainment for all ages has already begun. Among its offerings are the Mandala Folk Ensemble, a company of dancers and musicians performing international folk dance, music, and song; the *Mystical Arts of Tibet*, sacred music and dance performed by the monks of Drepung Loseling, one of Tibet's most prestigious monasteries; pianist Eleanore Perrone; the On-Stagers performance of *Guys and Dolls*; Livingston Taylor; and the New England Civic Ballet performing *Sleeping Beauty*.

Merrimack students can, with a valid I.D., obtain two tickets for any event for \$5, as available thirty minutes before show time. Alumni, parents, and friends may call the box office for tickets at (978) 837-5355, Monday through Friday 10 a.m. to 4 p.m.

Peter Waldron of Haverhill has been appointed director of arts programming for the Rogers Center for the Arts. As such, Waldron will manage programming for the center, advance the arts within the college's curriculum, and work with area arts groups to bring diverse events and performances to Merrimack.

Previously a professor of theater at Bradford College, Waldron received an MFA in Theater Design from New York University and a BFA in Scene Design and Technical Production from the University of Texas at Austin. At Bradford, he also chaired the Creative Arts Division, managed the theater, and served as resident designer and technical director.

Waldron serves as chairman of the Haverhill Arts Commission, as president of Community Meals, Inc., in Haverhill, and on the board of directors for the Pentucket Arts Center.

BSU Hosts Dancers: From Salsa to Flamenco

Just as the air began to get cool last fall, the music and the dancing got hot. Hispanic Cultural Night, sponsored by Brothers and Sisters United, brought salsa dancers Sandra Suarez and Ralfi Rodriguez to campus, along with members of the Latin Ballet Academy, who performed a number of folk dances from around the Caribbean.

Caribbean food from Areito's Restaraunt and appetizers from the Dominicana Bakery, both in Lawrence, rounded out the celebration.

Tambakos Film Collection To Enrich Arts on Campus

Tony Award-winning playwright/actor George Furth of Hollywood made a gift of his extensive film collection to the college in memory of his friend and colleague Demmy (Peter) Tambakos '74. Furth provided a \$100,000 endowment for the collection, as well.

The collection contains more than 500 Academy Award-nominated films on laser disc. Many of the films will be shown on the college's closed-circuit television station, Channel 10.

At the time of his accidental death, Tambakos was an aspiring screenwriter.

Furth's career in Hollywood and on Broadway has earned him two Tony awards. Together with Stephen Sondheim, he wrote the musicals *Company* and *Merrily We Roll Along*.

It's a Job-Hunters' Safari

The Career Services and Cooperative Education Department cooked up a week-long schedule of events for students looking beyond graduation. Merrimack alumni got into the act, too, with the always popular Career Networking Night.

Students were able to attend seminars such as "Major in Success: Choosing a Major," sponsored by the Study Center; and "Getting into Graduate School."

Midway through the week, more than 150 alumni representing over 35 professions were on hand to talk with students as well as to make connections with each other at Career Networking Night. Each year, as part of the same program, the Alumni Office publishes a directory of graduates interested in making professional connections with other graduates and students. This year's book, distributed at Networking Night, includes more than 1000 names. For more information, please call John Obert '66 at (978) 837-5106 or e-mail him at jobert@merrimack.edu.

Capping the week was the annual Fall Career Fair. Representatives from more than 50 companies were on hand to discuss employment opportunities with students.

Frank Leone Jr. '61 photo

Members of the Friends of Merrimack Board of Directors include (front row, left to right) Joyce Campo, Maria Rosati, Joyce Daher Belko, Linda Arvanitis, Diane Coletta, Carmela Catuli, Maureen Imielkowski, (rear, left to right) Terry Schiavone, Mark Ford, George Schruender, Jay Doherty, Carol Poor, Jim Doherty, Larry Ardito, Bill Buck, Nancy Norbedo, Cle Jackson, and Fran Ferrara. Next to Fran is Richard Reming, executive director of the Friends of Merrimack.

Friends of Merrimack Membership Increases; Date is Set for President's Cup Tourney

Thanks to a push initiated by its board of directors, Friends of Merrimack membership has grown by 25%. More than 100 new members have joined, bringing the total number to nearly 500.

The Friends, a group of volunteers dedicated to raising money for scholarship support for Merrimack students, has also increased the number of people on its board. New members are Linda Arvanitis, William Buck, Evelyn Burke, Joyce Campo, Diane Coletta, Claudia Fanaras, Fran Ferrara, Maureen Imielkowski, Cleotha Jackson, Br. Thomas Long, Joseph Parolisi, Alfred Romano, Terrance Schiavone, and Richard Stanley.

Last year, the group raised \$107,000 from membership dues, the President's Cup Golf Tournament, and other events. Scholarships were awarded to 130 Merrimack students. The Friends endowment fund now totals more than \$2 million.

This year's President's Cup will be held Monday, June 5, 2000, at the Indian Ridge Country Club. For more information, call Richard Reming, executive director of the Friends of Merrimack at (978) 837-5117, or e-mail rreming@merrimack.edu.

Fabbricatore Chair in Entrepreneurship Endowed

An endowed chair aimed at attracting stand-out faculty in entrepreneurship has been named in honor of its benefactor, Robert J. Fabbricatore.

Fabbricatore, Chairman and CEO of CTC Communications Group, Inc. in Waltham, Mass., committed \$1 million to fund the chair.

"The Fabbricatore Chair in Entrepreneurship will play a critical role in helping the Girard School reach its goal of continuous improvement which is essential to attract the brightest students and top-notch faculty," said Dr. Thomas Dukes, Dean of Business Administration.

Can You Wear Pajamas to Work?

Turn in those loafers for fuzzy slippers, commuters. Many futurists predict the next business trend will keep employees home. Work on the ins and outs of telecommuting is going on now in Merrimack's marketing department.

Dr. Gina Vega and Dr. Louis Brennan have been awarded a research grant from Pricewaterhouse Coopers Endowment for the Business of Government to study telecommuting. Vega is an assistant professor of management at Merrimack; Brennan, formerly an associate professor here, recently accepted a position as a senior lecturer in International Management at Trinity College in Dublin.

Vega and Brennan's early research on telecommuting and organizational structure was funded by the college's Faculty Development Fund.

The PWC-funded project is entitled "Evaluating the Management of Telecommuting in the Public Sector and Potential Private Sector Applications." The researchers will focus on two federal agencies, describing the implementation and management of telecommuting.

Since the two researchers now live in different countries, much of their work will be conducted on-line.

The report will include recommendations on strategies that work and suggestions for improvements. Pricewaterhouse Coopers intends to disseminate the report widely in public, private, and academic communities.

New Faces and Old Friends at Campus Ministry

The campus ministry team, led by Rev. Joseph Farrell, O.S.A., has a pleasant mix of old friends and new faces. Dori White Pulizzi joined the staff as a campus minister; the Revs. Joseph Gillin and James Wenzel, O.S.A., round out the crew.

Charline Henry continues to serve as executive secretary.

Daily Mass is celebrated in the St. Augustine Chapel in Gildea Hall.

New Controller and Registrar Round Out Administrative Roster

Jennifer Ligenza

Nancy Trevethick

Kevin Salenme photos

Merrimack has hired a registrar, Jennifer Ligenza, and a controller, Nancy Trevethick, C.P.A.

Ligenza will manage and direct all functions of the Registrar's office, including registration, class scheduling, enrollment reports, and the development of new programs to assist in the ongoing refinement of student recordkeeping. In addition, she will provide support to various offices by collecting, analyzing, and interpreting data needed to complete various institutional reports.

Ligenza comes to Merrimack from Suffolk University where she served as Associate Registrar for Technology. During her tenure there she directed the university's computerized record-keeping, coordinated Web registration, and designed and implemented a system that enabled academic departments to add their own course offerings to the university database. Prior to Suffolk, Ligenza served as database administrator at Newbury College. She holds a master's degree from Boston College and a bachelor's degree from Elms College. She lives in Somerville, Mass.

Controller Nancy Trevethick will oversee staff and operations of the accounts payable, accounts receivable, payroll, and bursar offices. Other responsibilities will include monitoring and maintaining systems of internal control, providing internal and external reports on operations; monitoring budget performance; performing all aspects of cash management; and planning and facilitating the annual audits.

Trevethick previously served as controller at St. Paul School in Concord, N.H. She worked in public accounting at Dion, O'Hara & Co. in Hudson, N.H., and Pricewaterhouse Coopers in Boston.

Trevethick is a C.P.A. and received a master's degree in business administration from the Tuck School at Dartmouth College and a bachelor's degree from Mount Holyoke.

"Professors After Dark": the Lighter Side of Faculty

For students looking for a little something different, Professors After Dark hits the spot.

The program, coordinated by Pam Najarian, director of the Study Center, brings faculty members into the resident halls to discuss topics of interest to them.

This semester's topics include Meditation Practice, by Dr. Padraic O'Hare of religious studies; Sharing Tootsie Rolls with Jim, by Dr. Jim Tanton of mathematics; Stress Management, by Diane Aprile-Wass, of continuing education; and Culture, Religion, and Spirituality, by Linda Murphy, assistant to the president.

Remember the Link!!

Merrimack's community events hotline, (978) 837-LINK, keeps you informed about performances, sports schedules, news, and more. Call today!

Sen. Mitchell to Deliver Commencement Address

Senator George J. Mitchell will deliver the keynote address at the 50th commencement, planned for May 21.

Mitchell was appointed to the United States Senate in 1980 and served for 14 years, receiving an unprecedented 81 percent of the vote in the 1988 election. From 1989 until his resignation from the Senate, he held the influential position of Majority Leader.

Most recently, Mitchell served as the chairman of the peace negotiations in Northern Ireland, brokering an historic agreement among the warring political factions there.

Library Receives Grant

A grant from the Davis Education Foundation of Maine will allow the college to participate in the North of Boston Library Exchange.

This consortium, comprised of 28 area libraries, provides increased resource sharing and gives students, faculty, and community members access to more than two million items, including books, periodicals, and videos, at a fraction of the cost of purchasing those items.

The Davis Education Foundation was established by Stanton and Elizabeth Davis after his retirement as chairman of Shaw's Supermarkets, Inc.

Bruno, Girard elected to Board of Trustees

Joseph X. Bruno '80

The board of trustees has elected two new members, Francis E. Girard (see cover story) and Joseph X. Bruno.

Bruno is a 1980 graduate of the college. A partner at

Arthur Andersen in Boston, he joined the audit staff there directly after his graduation. He was named partner in 1992.

Bruno serves on the board of directors of the Association for Corporate Growth, a professional organization focusing on mergers and acquisitions and business development. He is a member of UNICO, a charitable organization that helps underprivileged children in the Merrimack Valley.

Bruno lives in Andover with his wife and two children.

Shareholder's Report

Your stock in Merrimack College increases in value every day. When you make a gift to Merrimack, you are investing in Merrimack's future. Here are a few examples of recent generous investments made to the college:

- Joseph '79 and Rose '79 (Kelley) Lorusso have made a gift of \$50,000 to establish the Lorusso Visiting Augustinian Scholar Endowment. The endowment will provide the funds to bring distinguished Augustinian Scholars to campus.
- Thanks to a generous \$110,000 gift from 25 Merrimack College alumni working at Arthur Andersen, including Joseph X. Bruno '80, who is a partner at Arthur Andersen and a Merrimack College Trustee, Merrimack's Business School unveiled its first high-tech classroom in the late fall. The classroom has a variety of multi-media and interactive equipment such as computerized white boards, video conferencing, document cameras, CD, and DVD.
- Robert J. Fabbriatore has committed \$1 million to fund Merrimack's second endowed chair. Mr. Fabbriatore is founder, chairman, and CEO of CTC Communications Group, Inc. of Waltham, Mass. The endowed chair is in entrepreneurship, which will play a critical role in attracting and retaining excellent faculty for the business school.
- Merrimack has been awarded a \$600,000 Challenge Grant from the prestigious Kresge Foundation for the construction of the campus center. In accepting the challenge, the college must raise \$4.2 million in the next 18 months from alumni, parents, and friends who give new or increased gifts to the campus center project.
- Tony Award-winning playwright and actor George Furth of Hollywood donated an extensive collection of more than 500 Academy Award-nominated films on laser disc. Furth also gave a \$100,000 endowment to maintain and enhance the collection. He made his gift in memory of his friend and colleague Demmy (Peter) Tambakos '74. The movies are available for students to borrow, to view in the McQuade Library screening room, and to broadcast on the campus' closed-circuit television station.

Ciejek Fellow Longsworth Examines 11th Century Church Statues

by David Rattigan

In Northern Italy, individual ancient chapels are grouped in sanctuaries that run up the slopes of hillsides. In the region of Piedmont, west of Milan, for example, there are 20 chapels leading up the "Sacro Monte" (Sacred Mounts) over Varese.

This is a site where believers make their pilgrimage, from chapel to chapel, up to the sanctuary atop the mountain. Visitors are kept out of the chapels by iron bars, but through the windows can see life-size, painted and gilded sculptures, made of terra cotta and wood, depicting scenes from Catholic tradition.

"They're individual re-enactments, as if this were real theater," says Dr. Ellen Longsworth, laying out photographs of the statues. "In this case the life of the Virgin, and the life and trials of Christ. It took me two hours to walk up and come back down, taking photographs."

Using the metaphor of an Italian meal, the sanctuaries on the mountains are the "contorni," Longsworth says, that which goes around it. For her, the main dish is found in a little church in Milan.

In 1998, Longsworth became the fourth faculty member to receive a

Ciejek Fellowship for Humanistic Research and Study in Liberal Arts. It supported her project to return to Italy and study a set of statues found inside a c. 1030 church which had been overlooked by previous inquiry.

The art historian and Merrimack College professor believes it's an important discovery, she told a gathering of faculty, students and alumni in a talk on October 6, 1999.

"As an art historian, if you're lucky to find objects like this which haven't had any or much attention paid them, you not only want to scrutinize them as

closely as possible, but also to determine what they are stylistically and realistically. You want to see how to relate them [to other art of the period and region], to understand the context for these figures."

Longsworth has been familiar with the Holy Sepulchre of Christ Church for 17 years, but didn't realize the treasure inside until fairly recently. In 1983, Longsworth was gathering information for her dissertation, staying in Milan and doing much of her research at the Biblioteca Ambrosiana, which is contiguous to the library.

"I was going in and out of churches, looking at Renaissance tombs (tomb art is a specialty) and late Medieval tombs, and when I walked into the door of this little church, it looked like a product of the 17th century, which is not Renaissance. It's Baroque. I never went farther inside the door."

ment - than anything I saw at Sacro Monte, for instance."

Longsworth is unsure she'll ever determine the names of the artists, but figures it was a collaborative effort involving a sculptor and a painter or painters, as was the norm in this type of work.

Inside the church, in apsidal chapels (semi-circular extensions) on either side, the figures play out two scenes from the passion of Christ: Christ washing Peter's feet at the last supper (when Christ told Peter that he would deny him, and Peter assured him "Never"); and Peter's denial of Christ before Caiaphas.

Sitting between the two scenes, one can feel an emotional charge, as if one was a spectator in a cinema. As Longsworth put it in her talk, "The action which we find in the Bible is played out across the space of the church." Not just Christ's story but also

Dr. Ellen Longsworth, professor of Fine Arts and Ciejek Fellow

finding, in fact, that this tradition is more widespread than scholarly research has admitted.

"This field has gotten very little attention because it appeals to a popular, folk-art mentality. They're not what scholars - many of them - would call high art. High art is made from marble, bronze, and other expensive materials, not wood and terra cotta, not painted in a life-like manner, but it is very important. It's not what would be called pop or folk art today, but it was popular. That's what people wanted."

David Rattigan is a journalist based in Salem, Mass. While not an alumnus himself, he claims family status. His brother, John, graduated in 1979.

Ellen Longsworth photo

An example of the life-size, painted and gilded sculptures Longsworth found in Northern Italy.

The action which we find in the Bible is played out across the space of the church.

She discovered the treasure inside during a visit back during a sabbatical in 1992, while doing further research on Renaissance tomb art. Walking into the church, she discovered the terra cotta sculptures which depict groups of life-size figures - Christ, the apostle Peter, other disciples, Caiaphas, other guards - in biblical scenes.

"The figures themselves are quite handsome," Longsworth says. "In terms of quality, they're better - in my judg-

Peter's, the faithful follower who slips up and denies his master.

When Longsworth first began studying the art of Medieval and Renaissance tombs, few people were aware of the depth and breadth of that field. Since then, it's drawn increasing attention. So, too, she expects increased interest in sculpture such as this.

"In 16th century Italy, these kind of theatrical, emotion packed groups became quite popular," she says. "We're

It's Spring Break — Break Out the Books!

by Wendy Darwin Wakeman '93

On campuses around America, spring break means Daytona or Cancun or Key West — somewhere sunny, warm, and carefree. It's no wonder. Spring break comes at a time when most of us are ready for a good vacation.

But whether to study business practices in another culture or to minister to the needs of the poor in Brooklyn and Alabama, the Merrimack community has a long tradition of spending spring break a little more productively.

For a group of faculty from across the curriculum, this spring break will be devoted to learning more about Augustine of Hippo, whose life and service to the church inspired the beginning of the order of friars which founded Merrimack.

The group will do more than just read and discuss St. Augustine's life and works. Under the leadership of Rev. Jim Wenzel, O.S.A., they'll travel together to Italy and visit some places where Augustine lived. Wenzel, who attended Merrimack from September 1948 to June of 1950 before joining the order, is a recognized Augustinian scholar as well as a recent addition to both the Center for Augustinian Study and Legacy and campus ministry staffs.

Sponsored by the college through its Center for Augustinian Study and Legacy, the ten-day tour is called "In Italy with St. Augustine: An Augustinian Symposium, Seminar, and Pilgrimage." Wenzel has modeled the symposium on a similar project he led as part of his doctoral thesis in 1991. At that time, he led a group of Augustinian friars from three provinces through Italy for six weeks. "It was very extensive and intensive," said Wenzel, and the experience included a week of retreat at Lecceto, near Siena, in Tuscany, the site

of an ancient Augustinian foundation and currently home to an order of contemplative Augustinian nuns.

Retreatants focused on answering the question "What does it mean to be an Augustinian friar?" From their answers, Wenzel wrote his dissertation.

While that kind of serious scholarship isn't planned for this trip, participants are prepared for an intellectually demanding week of study, rather than the leisurely touring and shopping a typical tour group might undertake.

To prepare, participants have been meeting since December in a seminar. "One of the first things we read was one of Augustine's earliest works, *The Happy Life*," Wenzel said. The reading generated a lively discussion, including the participants' views on the meaning of happiness.

"You can imagine," said Deborah Burns, a professor of English, "very few of us accept things without intellectual challenge. And [Augustine's] *The Happy Life* is very absolute in style." She said the discussion of the work was very much like what she does in the classroom with her own students.

Burns is one of 15 faculty members participating in the symposium. Many disciplines are represented, including sociology, modern languages, philoso-

phy, biology, and psychology. To be considered for the trip, faculty members were required to write an essay on why, personally and professionally, the experience would benefit them.

Among the 15 chosen, Wenzel hopes that a community of friends — in the Augustinian spirit — will develop. Of himself, he says, "In background and interest, I am profoundly Augustinian."

With that background and interest and a résumé which includes almost four years of ministry in Italy, Wenzel will lead the Merrimack group through a crowded itinerary which begins with a visit to the Cathedral of Milan, under which the site of Augustine's Baptism has been excavated. Other highlights of the trip will include a visit to Firenze and the famous Augustinian Church, Santo Spirito; San Gimignano, home of an international community of Augustinian friars, a center for Augustinian spirituality, and the place where Wenzel ministered; Rosia and San Leonardo di Lago, sites of ancient Augustinian foundations; the convent at Lecceto; the birthplace of St. Clare of Montefalco, an Augustinian nun; Ostia, the port in Rome where Augustine arrived and left Italy, and where Monica, his mother, died; a tour of St. Peter Basilica; the Augustinianum, a center for the study of

This fresco, *Sant' Agostino insegna legge, retorica e filosofia a Roma* (St. Augustine teaching law, rhetoric, and philosophy in Rome), was painted by Florentine artist Benozzo Gozzoli in 1464 and 1465. It is located in La Chiesa di Sant' Agostino in San Gimignano, Italy. Many thousands of tourists visit the frescoes in San Gimignano each year; this spring, a Merrimack group will be among the visitors. For movie buffs, San Gimignano is the site of the second half of the film *Tea with Mussolini*.

patristics; and the General House of the Augustinian Order, both located across the street from St. Peter Basilica in the Vatican.

Wenzel noted that the cloistered convent of Augustinian nuns at Lecceto will be of particular interest. The sisters at Lecceto shatter many preconceptions: Many are under 35, all are well-educated with doctorates, two are medical doctors.

At each site visited, lectures and liturgies will add fuel to the symposium's intellectual discussions. All the while, Wenzel hopes, the faculty members will find ways to incorporate what they've learned into the classroom.

For Deb Burns, the lessons aren't restricted to what can be passed on to students, but are part of a greater meaning of community so important to Merrimack as an Augustinian college.

"I'm not a Catholic," she said. "But I've always felt comfortable here. This course, and things like it, give us a way of learning what in Catholic culture matters most."

Fall Season Review

Cross Country

The women's and men's cross country teams enjoyed perhaps the best season of all the fall sports. The women's team won its third consecutive Northeast-10 Conference championship while the men's team finished in second place behind Bentley College. The Lady Warriors were led by senior Andrea Leonard who finished in first place overall with a time of 19:41.4. She was named Northeast-10 Women's Runner of the Year for the third straight year. Merrimack head coach Chris Cameron was named Northeast-10 Women's Coach of the Year for the second time for his efforts in leading the Lady Warriors to the conference crown. Also helping the Lady Warriors' effort was junior Katie Schroth, who finished second overall and joined Leonard on the NE-10 All-Conference First Team. Freshman Jessica Perrone was the lone Merrimack representative on the second team finishing in 11th place overall.

The men's team finished with 44 points overall, the lowest total ever recorded by a Merrimack men's cross country team at the Northeast-10 championships. Freshman Tyler Bloom finished in second place earning Northeast-10 Newcomer of the Year accolades and First Team All-Conference honors. Junior Angelo Santitto finished in fourth place overall earning First Team accolades while freshman Matt Kacamburas and sophomore Ronnie Montgomery finished in 14th place overall. She was the top finisher from the Northeast-10 Conference and her 14th place was the best ever for a Merrimack College runner. Bloom finished 24th overall to lead the men's effort.

Al Pereira photos

Senior field hockey player **Candice Kulacz** was named to the NFHCAA Second Team All-America for the second consecutive season.

Field Hockey

The field hockey team showed tremendous improvement from last season winning two more games and posting a 5-11 record. The five wins were the most for the Warriors since the 1997 season. Senior Candice Kulacz was named as a NFHCAA Second Team All-America for the second consecutive season. She also was selected to play in the NFHCAA North South All-Star Classic. Kulacz scored a team-

high 10 goals while adding two assists for 22 points. The Warriors ranked fourth in the Northeast-10 conference in team offense (1.38 goals per game) and fifth in team defense (2.00 goals per game). Fellow senior Jen Conway was Merrimack's top netminder. She notched a 2.00 goals against average and a .881 save percentage. Conway ranked third in the conference in saves per game recording 11.00 per contest. The Warriors will look for continued improvement next season as they lose only three players to graduation.

Women's Tennis

The women's tennis team posted a record of 9-4, 7-2 in the Northeast-10 conference. The Warriors finished in second place in regular season conference play but fell in the semifinals of the conference tournament. Freshman Elizabeth Ryan led the way for the Warriors. Ryan, who played first singles for Merrimack throughout the year, was named Northeast-10 Newcomer of the Year and was named to the All-NE-10 First Team. She finished the year at first singles with a record of 10-2.

Women's Soccer

The women's soccer team notched a school record 17-3 mark on its way to its second appearance in the NCAA Division II New England Regional. The Warriors captured a share of the Northeast-10 regular season title and then won the conference tournament with a 1-0 victory over Assumption College. Senior Lisa Jensen was named to the NSCAA All-America First Team and garnered Northeast-10 Conference Defensive Player of the Year honors for the second year in a row. Freshman Patty Cronin was named the Northeast-10 Newcomer of the Year while junior Kathy Cote earned Northeast-10 Championship Tournament Most Valuable Player accolades. Merrimack placed four other players on the Northeast-10 Women's Soccer All-Star team. Senior Sue Cookson and sophomore Rachel McCarthy joined Jensen on the First Team while junior Kelly Shepherd and sophomore Melissa Edwards joined Cronin on the Second Team. Jensen, Cookson and McCarthy also earned NSCAA All-New England First Team accolades. As a team, Merrimack set the conference record for goals scored in a season with 98 in 20 games averaging 4.9 goals per game. The Warriors were ranked 10th in the nation and second in the New England region in the final NSCAA Rankings.

Lisa Jensen '00 was named to the NSCAA All-America First Team and garnered the Northeast-10 Conference Defensive Player of the Year honors for the second year in a row.

Men's Soccer

The men's soccer team finished the year with a 10-10-1 mark and advanced to the ECAC Division II Championship for the sixth consecutive year. Even though the Warriors fell to the eventual champion St. Anselm, 6-1, Merrimack's success this season could not be overlooked. The Warriors advanced to the Northeast-10 Championship final for the fifth time in the last six years and recorded their sixth consecutive season with 10 wins or more. Senior back Daniel Pearce scored a career-high four goals to help Merrimack come back from a 3-1 deficit in the second half and defeat American International College and advance to the NE-10 semifinals. In the semifinal round, the Warriors defeated Assumption College, 3-2, in double overtime to advance to the Championship game. Pearce was named the Northeast-10 Defensive Player of the Year for the second consecutive year and earned First Team All-NE-10 accolades. He was joined on the First Team by his brother, Eric. Senior Matt Johnson and freshman Matthew Lynch earned All-NE-10 Second Team honors while sophomore Steve Gould garnered Honorable Mention accolades.

Calvin Bryant '00 (#31 above) earned First Team All-EFC accolades. The football team finished with a record of 7-3.

Football

The football team finished with a record of 7-3 and placed eight players on the All-Eastern Football Conference All Star teams. The seven wins for Merrimack set a school record for wins in season while the 7-3 mark sets a record for winning percentage (.700). The season began with a record-tying four-game winning streak before the Warriors hit a slump, dropping three straight including two by 12 points or less. Merrimack then rebounded to win its last three games of the regular season. Seniors Jimmy Festa and Robert Slattery highlighted the eight players on the All-EFC team as each player earned individual honors from the conference as well. Festa was named as the conference's Defensive Player of the Year while Slattery was named Defensive Lineman of the Year for the second consecutive season. Fellow senior Calvin Bryant earned First Team All-EFC accolades and joined Festa and Slattery on the New England Football Sportswriters Division II and III All New England team. Merrimack also had three other players earn First Team

All-EFC Honors. Junior guard Joe Ryan was named to the First Team offense while junior defensive tackle Troy Mailloux and sophomore defensive back Messiah Burch were named to the First Team defense. Junior offensive lineman Lou Fejes and junior kicker R.J. Noto received Second Team All-EFC honors.

Volleyball

The volleyball team recorded the second highest win total in school history (18) and set a school record for winning percentage (18-11/.621). The Warriors won the program's first Northeast-10 regular season championship but were upended in the Tournament semifinals falling to eventual champion, Pace, 3-0. Junior Heather Racz was named to the All-Tournament Team after recording 15 digs and one ace in the semifinal match. The Warriors also placed two players on the All-Northeast-10 conference all-star team. Sophomore Courtney Desrosiers earned First Team accolades while junior Kristen Wysocki was named to the Second Team. Desrosiers became the

school's all-time service ace leader in 1999 notching her 148th career ace. Wysocki is the school's all-time leader in blocks (438) recording a team-high 172 this season. Head coach Keith Schoonover was named Northeast-10 Coach of the Year for his efforts in leading the Warriors to a 8-1 regular season conference finish. Merrimack defeated Bentley College, 3-1, to clinch the Northeast-10 regular season title. The match marked the Warriors first victory over the Falcons in the last 30 meetings between the two teams.

Jeanne Gerber '66 Discovers It's a Jungle Out There

It's one thing to tour the rain forests. It's an entirely different experience to spend six hours a day mopping your brow as you clear brush and construct trails under the forest's leafy green canopy.

Jeanne Gerber '66, of Needham, Mass., saw the rain forest first-hand during a recent two-week Global Volunteers service program in Costa Rica. (Global Volunteers is a St. Paul, Minn.-based nonprofit organization that each year coordinates nearly 150 one- to three-week service projects in 18 countries around the world.)

Gerber worked shoulder-to-shoulder with high-school students building trails and improving signage in the Santa Elena cloud forest. In the process, she made friends, recharged spiritual and emotional batteries, and gained a unique perspective on this Central American country.

"It was fascinating to be in a developing country and experience some of its growing pains," said Gerber, who is a fifth-grade teacher in the Needham Public Schools.

It was an interest in the potential healing aspects of rain forest plant life and Costa Rica's emphasis on peace and nonviolence that prompted Gerber to trek to the Central American country. The highlights of her trip, she said, were the steep green hillsides of Costa Rica, the little girls in their Sunday best, and the hot springs at Tabacon — "a treat after hiking the two longest trails at the Santa Elena Reserve."

Jeanne Gerber paints a sign while volunteering in the Costa Rican cloud forest.

Steve Waluk has been appointed to the City of Newport (R.I.) Zoning Board of Review. He's the youngest person ever to be appointed. Steve is constituent affairs liaison for Rhode Island Governor Lincoln Almond.

Can You Help Return the Ring?

We've been contacted by someone who found a 1952 class ring, monogrammed WBC. Our records lead us to believe it was owned by William Brumby Campbell, since deceased. We'd like to return the ring to his family, though. If you have information on Mr. Campbell, please call the Alumni Office at (978) 837-5440.

Robert and Heather MacNeil Pfordresher '92

John H. Collins '51 of Wakefield, Mass., died August 14. He was 72. John was a Navy veteran of World War II and had been employed with the Ark Insurance Co. of Reading. He was the husband of the late Elaine (Gallagher) Collins. He is survived by two sons, John of North Reading and Brian of Mansfield; two daughters, Sharon Beals of Easton and Diane Meador of Wayland; two brothers, Robert of Taunton and James of Hilton Head, S.C.; and seven grandchildren.

Richard T. Fitzpatrick '52 of Laconia, N.H., died August 6. He was 72. A retired supervisor for the U.S. Postal Service, Richard was a Navy veteran of World War II. He enjoyed traveling around the world. He is survived by two sisters, Eileen Curran of Laconia and Josephine Lally of Pocasset; and many nieces, nephews, grandnieces, grandnephews, and a great-grandniece.

Marlen P. (McAuliffe) Miller '57 of Palm Coast, Fla., and Moultonborough, N.H., died October 11. She was 63. She was a kindergarden and first-grade teacher at Arlington and General Donovan schools in Lawrence, Mass., for 20 years before retiring in 1990. She leaves husband Louis Miller; sons and daughters-in-law Dr. Mark Morrow and Valerie of Cleveland Heights, Ohio, and Hugh Morrow IV and Mary of Round Rock, Tex.; daughters and sons-in-law Elizabeth and Philip Towle of Hampton, N.H., and Victoria Morrow and Steven Turner of Santa Monica, Calif.; sister Claire Thom of Flagler Beach, Fla.; brother Daniel McAuliffe of Venice; nine grandchildren; and several nieces and nephews.

John E. Valeri '57 of Lynn died October 7 after a brief illness. He was 73. He was a retired teacher, having taught at the Pickering Junior High School and at Lynn English High School, where he served as English coordinator for 10 years and as head of the English department from 1987 until his retirement in 1990. He was the assistant faculty manager at Lynn English, junior varsity baseball coach and assistant baseball coach at St. Mary High School and was elected head baseball coach at Lynn English. John was elected to

the first Lynn English High School hall of fame, was a member of the Wyoma Lions Club, the Bosox Club of Boston, the Lynn Teachers Union, and Lynn Administration Association. He is survived by his wife of 44 years, Mary (Kirby) of Lynn; son John Jr. of North Attleboro; daughter, Julia El Assaad of Coronado, Calif.; two brothers, Francis and Ronald, both of Lynn; and two sisters, Virginia and Marie Cacciatore, both of Lynn.

Robert L. Kelly '58 of West Yarmouth, formerly of Chelmsford, died August 18. He was 72. He was the husband of Cecile (Proulx) Kelly, to whom he was married for 47 years. He served in the Navy during World War II and the Korean War. He worked as a corporate policy analyst for Raytheon Co. in Lexington for 38 years. He was a communicant of St. Mary Church in Chelmsford. Besides his wife, survivors include a son, Robert Kelly Jr. and his wife Michelle of New Hartford, Conn; two daughters, Patricia Zulkiewicz and her husband Rick of Chelmsford, and Janet Walton and her husband Scott of Advance, N.C.; a brother, Raymond and his wife Shirlee of Fort Meyers, Fla.; and six grandchildren.

Rose Marie J. Gallant '59 of Lawrence, died September 3, 1999 at Brigham and Women's Hospital in Boston. She was 78. Rose was a registered nurse who worked as a school nurse for the Lawrence school system. She also worked at Lawrence General Hospital and Deaconess Hospital in Boston. She was a member of St. Augustine Church in Andover and the Immigrant City Archives. She is survived by her husband of 42 years, Claude Gallant; son Andrew of Sandown, N.H.; daughter Marybeth Gallant of Hudson; brothers the Rev. J. Fernand

Gallant, S.M., of Framingham and Richard Gallant of Cupertino, Calif.; and several nieces and nephews.

Robert R. Seymour '64 of Fairfax, Vt. died on September 4 at Dartmouth-Hitchcock Medical Center in Lebanon, N.H. He was 59. He was employed at IBM as an engineer and departmental manager of the Failure Analysis Division for more than 30 years, until his retirement in 1995. He was a past member of St. Luke Church where he was a lector and co-director of St. Luke parish Youth Ministry. He was also a past Fairfax Boy Scout and Webelos pack leader. He was president of the Vermont chapter of Una Voce and editor of the Catholics United for the Faith newsletter. He was passionate in his study of religion, theology, and philosophy. Robert is survived by his wife, Joanne; two sons, Robert Jr. and his wife, Nancy, of Germany and John and his wife, Trisha, of Harlingen, Texas; three daughters, Suzanne Seymour of Westford, Mass., Renee Seymour of Austin, Texas, and Christina Schweter and her husband, Ryan, of Austin, Texas; two brothers, Henri and his wife, Frances, of Lawrence, and Joseph and his wife, Jo Ann, of Haverhill; two grandchildren; several nephews and cousins; and a special "adopted" son, Floyd McSweeney of New Jersey.

Ronald A. Shamberger '65 died August 30 at Vencor Hospital in Brighton following a lengthy illness. He was an industrial engineer at Compaq Computer. He attended St. Lucy Church in Methuen. A loving husband and father, he is survived by wife Rose (Matses); son, David of Cambridge; daughter Lauren '91 and husband Paul Giggey '91 of Andover; parents Alfred and Mary (Buika) Shamberger of Methuen; brother James of Londonderry,

N.H.; grandchild Ryan Giggey of Andover; and several nieces and nephews.

Kenneth J. Walsh '67 of Shrewsbury, formerly of Hopkinton, died August 8 after an illness. He was a psychologist at Worcester State Hospital. He was a member of the American Psychological Association and Sigma Xi, a science honor society. He leaves his wife of 30 years, Kathleen (Meany) Walsh; a son, Kevin of New Haven, Conn.; a daughter, Maureen Walsh of Stillwaters, Okla.; two brothers David and W. Garrett, both of Waltham; and several nephews and nieces.

Richard A. Ritter '76 of Georgetown died on August 11. He was 52. He was a realtor with Prudential Real Estate in Methuen. He served in the U.S. Army in Vietnam. He was a member of the Methuen VFW, the Erie 4 Fire Co. of Georgetown, Georgetown Kiwanis, Civil War Round Table Club of Newburyport, and the First Baptist Church in Methuen. He leaves his wife Geraldine (Minchin); mother Lucille (Feugill) Ritter of Methuen; daughters, Jennifer and Melissa both of Georgetown, and Tayna of Newburyport; brother David of Methuen; sister Marlana LeSage of Sandown, N.H.; and several nieces and nephews.

William F. Newell III '81 of Roswell, Ga., formerly of Peabody, Mass., died suddenly at home. He was 42. He was employed as an underwriter with Travelers and CNS Insurance Company. He is survived by his father, William Newell Jr.; sons, William and Kevin, both of Georgia; and two sisters, Catherine Keenan of Middleton and Patricia Labao of Salem. He was the former husband of Maureen (Beatrice) Newell.

Paul Laffin '84 of Hartford, Conn., died September 20. He was the associate director of residential services at St. Elizabeth Shelter in Hartford. Laffin was fatally stabbed by a mentally ill homeless man who had often taken meals at the shelter. Laffin had dedicated his life to community service. A story about his death in the *Boston Globe* said, "His car was a clunker. His apartment was a mess. He never made big money or commanded a large staff. But in the streetwise world in which he

operated, Paul Laffin moved mountains." He is survived by his parents, Margaret and Arthur Laffin; six siblings; several nieces and nephews; and numerous friends who will greatly miss his warmth and generosity.

John J. Greeley '86 of Lynnfield died on August 8 at a local nursing home after a lengthy illness. He was 80. He was a former vice-chairman of the Lynnfield Finance Committee. John was an accountant with the General Electric Company. He also worked at the West Lynn Plant for many years. He was the financial officer of the Linnehan Council of the Knights of Columbus and was a member of the "Spark Plugs," a West Lynn GE group, and the Thompson Quarter Century Club. John also served on the board of directors at the former Lynn Hospital and at Eastern Bank. He is survived by his wife, Elizabeth (McNiece) Greeley; a son, James '71 of Andover and his wife Nancy; a daughter, Ann Marie Kieran and her husband James of North Reading; a brother, James of Lincoln; two sisters, Mary Greeley of Brighton and Sister Rita Greeley, Sisters of Charity in Wellesley; and seven grandchildren.

Timothy E. Shea '89 of Sutton, Mass., died July 8 after a lengthy illness. He was 33. Tim was president of his family's computer hardware company, The Pixelink Corp. He sold the Hudson-based company to Illinois' Richardson Electronics in early 1999. He was fond of outdoor sports. He is survived by his wife, Kathleen Braun Shea of Sutton; his parents, John and Janice (Edwards) of Eastham; a brother, Michael of Plymouth; two sisters, Mary Flanagan and Ellen Byrd, both of Marshfield; his paternal grandmother, Helen of Worcester; and 11 nieces and nephews.

Mark R. Baxter '93 of Worcester died at St. Vincent Hospital in Worcester. He was 28. He was a supervisor and case manager for Horace Mann Educational Associates in Franklin, where he worked since 1995. He was deeply interested in Celtic history and was a collector of U.S. Civil War memorabilia. He leaves his father, Robert, of Boston; his mother, Deborah (Lantiegne) Baxter, and brother Brian both of Northboro; his paternal grandfather, Lloyd Baxter of Worcester; his maternal grandmother Elvie Lantiegne of Rutland; uncles and aunts; and a close friend, Racheal Mars of Shrewsbury.

TELL US ABOUT YOURSELF

If you've received an award or a promotion...been married or had a baby...earned a graduate degree...moved...obtained a new job...celebrated a special anniversary...taken an exotic vacation... or have other news (or tantalizing bits of gossip) you'd like to share, write us. Send photos along, if you wish, the more candid the better. Please complete the form below or use the electronic register AlumniNet at www.merrimack.edu.

Dear Fellow Alumni,

Eleanor Roosevelt said, "When you cease to make a contribution you begin to die."

While I wouldn't directly link her words to your contribution to Merrimack, it's something to think about.

Now is the best time ever to increase your gift to Merrimack.

Merrimack has been awarded a \$600,000 Challenge Grant from the prestigious Kresge Foundation for the construction of the college's campus center. The Kresge Challenge, in higher education philanthropy, is the equivalent of playing in the Super Bowl! An extremely prominent foundation, Kresge is very selective in its funding and supports only those colleges and universities whose enrollment is robust, its endowment healthy and growing, and fundraising capabilities strong. As alumni, we should be proud that our college has received this Challenge Grant, and we can show our pride in a very tangible way.

The challenge for Merrimack is to raise \$4.2 million in the next 18 months from new and increased gifts. Alumni who made a gift last year will be asked to increase their gift this year, and alumni who did not give to Merrimack last year will be asked for a new gift. The dollars raised from the increases and the new gifts will go toward the Kresge Challenge and help build the campus center.

The success of this very important challenge depends on the participation of our alumni body. I hope you will choose to be a part of Merrimack's growth. I also ask that you please spread this exciting news to your fellow alumni and encourage their support of this ambitious project.

As you read this issue of *Merrimack*, I know you will share my excitement with the new opportunities being presented to our students. Thanks to the generosity of fellow alumnus, Frank Girard '62, we will have a new business school, which will elevate Merrimack's academic standing and reputation in the national arena. International study has been more fully integrated into the curriculum, both in the business school and throughout the college. Our faculty continue to be leaders in their fields, as witnessed by the work of professors like Dr. Ellen Longsworth and Dr. Josephine Modica-Napolitano. Other members of our faculty will participate in a unique program this spring break, tracing the intellectual journey of St. Augustine. So as you can see, it is not only our campus that is growing, but our academic programs as well.

As Merrimack's reputation, both regionally and nationally, grows in esteem, so grows the value of our diplomas. Be a part of the achievements of our college, and make a special contribution to the Merrimack Fund this year.

Sincerely,

David Oxtan photo

Chris Liebke '79

Make sure your friends can find you at Reunion 2000 June 9 and 10, 2000

And make sure you can find them, too. Call or e-mail
the alumni office for a class list today:

Show 'Em We're Warriors!

**We've proved Merrimack is world class again and again —
in our classrooms, on the ice, in the world, on the court,
even in the barrios of Santo Domingo.**

**We know we've got what it takes to meet any challenge.
That's why we've accepted our biggest fundraising challenge yet
— a Kresge Challenge.**

**The Kresge Foundation funds only the cream of the crop —
top-notch schools with healthy endowments and strong
management. The trustees of the foundation have voted to
donate to Merrimack \$600,000. There's just one catch.
In order to receive the grant, we must raise \$4,213,750 by
January 1, 2001, and we must raise it in new gifts and
increased gifts.**

**We can do it.
To do your part, send your contribution today.
Show Kresge what we're made of.**
